

Naan Mudhalvan

Salesforce Developer (Course)

Assignment

Name: VIGNESHWARI G

Naan Mudhalvan id: 992F1D090ECA0678D20425CD8681FACF

Year and Dept: 4th year and CSE

Batch: 2024

Zone.no: Zone 8

1.Create a Master-Detail Relationship between two Custom objects and also create a Roll Up Summary Field to Calculate total number of records.

Salesforce screenshot showing the 'New Custom Object' setup page.

Custom Object Definition Edit

Custom Object Information

The singular and plural labels are used in tabs, page layouts, and reports.

Label:	College	Example:	Account
Plural Label:	Colleges	Example:	Accounts
Starts with vowel sound:	<input type="checkbox"/>		

The Object Name is used when referencing the object via the API.

Object Name:	College	Example:	Account
--------------	---------	----------	---------

Description:

Context-Sensitive Help Setting:

- Open the standard Salesforce.com Help & Training window
- Open a window using a Visualforce page

Content Name:

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name:	College Name	Example:	Account Name
--------------	--------------	----------	--------------

Rename Tabs and Labels

Tabs

Didn't find what you're looking for? Try using Global Search.

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

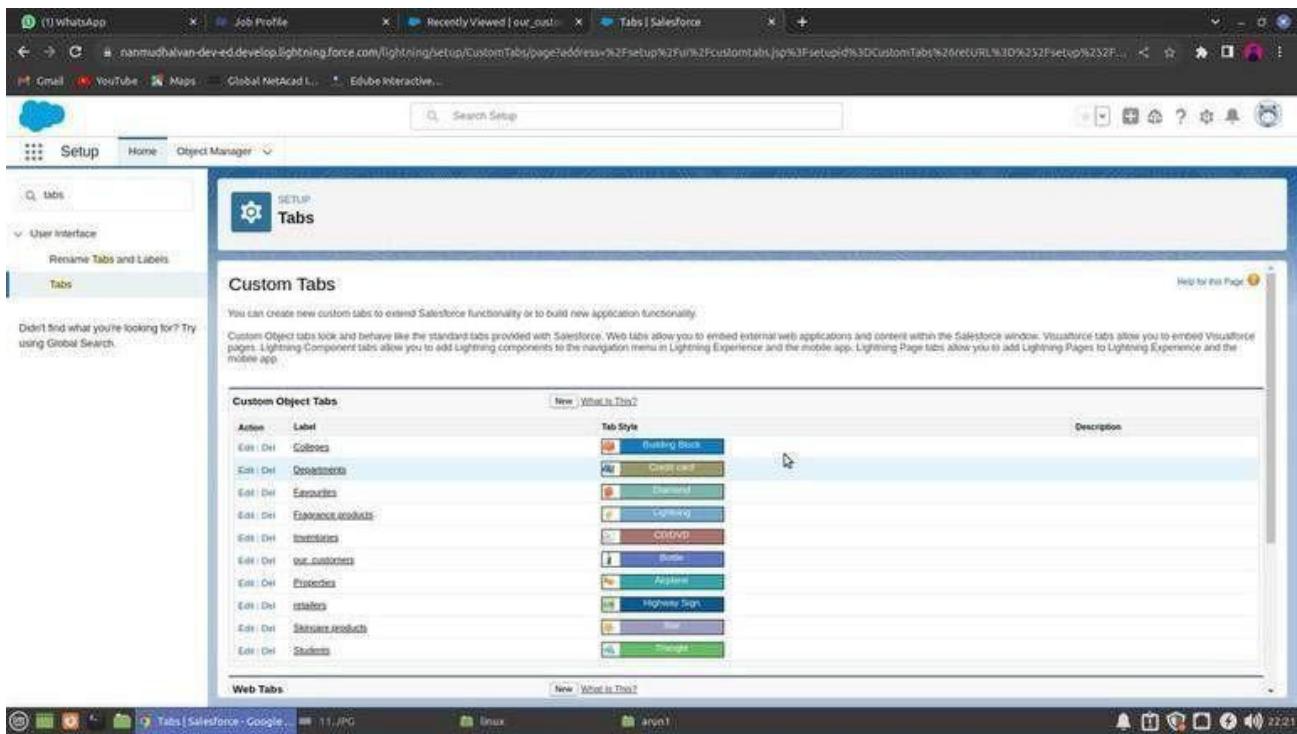

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Custom Object Tabs

Action	Label	Tab Style	Description
Edit Del	Courses	Building Block	
Edit Del	Commitments	Copy card	
Edit Del	Executives	Diamond	
Edit Del	Excessive products	Lightning	
Edit Del	Invoices	ODD/EVD	
Edit Del	our customers	Rule	
Edit Del	Processes	Appliance	
Edit Del	retailers	Highway Sign	
Edit Del	Skincare products	Smart	
Edit Del	Students	Thought	

Web Tabs

New What Is This?

Screenshot of the Salesforce Setup interface showing the 'Department' object details. The 'Fields & Relationships' tab is selected. A large table lists various field types with their descriptions:

Field Type	Description
Currency	Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.
Date	Allows users to enter a date or pick a date from a pop-up calendar.
DateTime	Allows users to enter a date and time, or pick a date from a pop-up calendar. When users click a date in the pop-up, the date and the current time are entered into the Date/Time field.
Email	Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.
Geolocation	Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.
Number	Allows users to enter any number. Leading zeros are removed.
Person	Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.
Phone	Allows users to enter any phone number. Automatically formats it as a phone number.
Picklist	Allows users to select a value from a list you define.
Picklist (Multi-Select)	Allows users to select multiple values from a list you define.
Text	Allows users to enter any combination of letters and numbers.
Text Area (Long)	Allows users to enter up to 255 characters on separate lines.
Text Area (Rich)	Allows users to enter up to 131,072 characters on separate lines.
Text (Encrypted)	Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.
Time	Allows users to enter a local time. For example, '2:40 PM', '14:40', '24:40:00', and '14:40:50:600' are all valid times for this field.
URL	Allows users to enter any valid website address. When users click on the field, the URL will open in a separate browser window.

Buttons at the bottom right include 'Next' and 'Cancel'.

Screenshot of the Salesforce Setup interface showing the 'New Custom Field' creation process for the 'Department' object. Step 2: Enter the details.

Step 2: Enter the details

- Text Area (Rich): Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.
- Text (Encrypted): Allows users to enter any combination of letters and numbers and store them in encrypted form.
- Time: Allows users to enter a local time. For example, "2:40 PM", "14:40", "14:40:00", and "14:40:50:600" are all valid times for this field.
- URL: Allows users to enter any valid website address. When users click on the field, the URLs will open in a separate browser window.

Buttons at the bottom right include 'Next' and 'Cancel'.

Screenshot of the Salesforce Setup interface showing the 'New Custom Field' step for the 'Department' object.

The left sidebar lists various configuration options:

- Details
- Fields & Relationships** (selected)
- Page Layouts
- Lightning Record Pages
- Buttons, Links, and Actions
- Compact Layouts
- Field Sets
- Object Limits
- Record Types
- Related Lookup Filters
- Restriction Rules
- Scoping Rules
- Triggers
- Flow Triggers

The main content area shows 'Step 2: Enter the details' for a new custom field named 'Dept_No.'.

Form fields include:

- Field Label: Dept_No.
- Field Name: Dept_No.
- Description: (empty)
- Help Text: (empty)
- Required: Always require a value in this field in order to save a record.
- Auto add to custom report type: Add this field to existing custom report types that contain this entity.
- Default Value: Show Formula Editor (disabled)

Notes at the bottom of the form:

User-defined prefixes, suffixes and decimal separator API names in double quotes ("field_name"). Include numbers without quotes. (123) View percentages as decimal (0.123), and express date calculations in the standard format (Today() + 7). To reference a field from a Custom Metadata Type record use @CustomMetadataType__Name__c@{CustomMetadataField__c}.

Buttons at the bottom right include 'Previous', 'Next', and 'Cancel'.

Details Fields & Relationships

Fields & Relationships

Specify the type of information that the custom field will contain.

Data Type

None Selected Select one of the data types below.

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a pop-up list. The other object is the source of the values in the list.

Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

The main content area is titled "Fields & Relationships" and displays four items sorted by Field Label:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Created By	CreatedBy	Lookup(User)		
Details Name	Name	Text(10)		✓
Last Modified By	LastModifiedBy	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓

Buttons at the top right include Quick Find, New, Deleted Fields, Field Dependencies, and Set History Tracking.

Screenshot of the Salesforce Setup interface showing the Object Manager - Details page.

The left sidebar shows navigation links: Setup, Home, Object Manager, Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Triggers, and Flow Triggers.

The main content area is titled "Fields & Relationships" and displays a list of relationship types:

- Lookup Relationship**: Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.
- Master-Detail Relationship**: Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:
 - The relationship field is required on all detail records.
 - The ownership and sharing of a detail record are determined by the master record.
 - When a user deletes the master record, all detail records are deleted.
 - You can create rollup summary fields on the master record to summarize the detail records.
- External Lookup Relationship**: Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.
 - Email**: Allows users to select a True (checked) or False (unchecked) value.
 - Currency**: Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.
 - Date**: Allows users to enter a date or pick a date from a popup calendar.
 - DateTime**: Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the DateTime field.
 - Geolocation**: Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.
 - Number**: Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.
 - Percent**: Allows users to enter any number. Leading zeros are removed.
 - Phone**: Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.
 - Picklist**: Allows users to enter any phone number. Automatically formats it as a phone number.
 - Picklist (Multi-Select)**: Allows users to select multiple values from a list you define.
 - Text**: Allows users to enter any combination of letters and numbers.

Screenshot of the Salesforce Setup interface showing the creation of a new custom field.

The page title is "SETUP > OBJECT MANAGER Details".

The left sidebar shows the "Fields & Relationships" section selected, with other options like "Page Layouts", "Lightning Record Pages", etc., listed.

The main content area is titled "New Custom Field" and is on "Step 2 of 4: Enter the details".

Form fields include:

- Field Label: Mail
- Field Name: Mail
- Description: (empty)
- Help Text: (empty)

Required checkboxes:
 Always require a value in this field in order to save a record
 Unique
 External ID
 Add this field to existing custom report types that contain this entity

Default Value: Show Formula Editor

Notes: Use formula editor. Enclose text and picklist value in double quotes ("The term"), include numbers without quotes ("123"), wrap dates as decimals (0.123) and negative date values in the standard format ((-123)) < 75. To reference a field from a custom formula type, enter @<CustomFormulaType>.fieldname@<CustomFormulaType>.fieldname_2

Salesforce Setup - Tabs | Salesforce

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Action	Label	Tab Style	Description
Edit	Courses	Building Block	
Edit	Demographics	Credit Card	
Edit	Details	Lightning	
Edit	Favourites	Dashboard	
Edit	Experience objects	Upfront	
Edit	Invoices	COVDO	
Edit	our customers	Book	
Edit	Properties	Airline	
Edit	retailers	Highway Sign	
Edit	Skincare products	Star	
Edit	Students	Bridge

Data Type

None Selected Select one of the data types below.

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a pop-up list. The other object is the source of the values in the list.

Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create roll-up summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a pop-up list. The master object is the source of the values in the list.

External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.
